

Ward 86

HIV Care and Prevention

The San Francisco's Department of Public Health's **Ward 86** is an internationally recognized global leader in HIV clinical care, research, and education. One of the San Francisco Health Network's 14 neighborhood clinics, Ward 86 is located at the Zuckerberg San Francisco General (ZSFG) campus and provides integrated primary and specialty care for patients living with HIV and those at risk for HIV acquisition, with a special commitment to uninsured, low-income, and medically underserved persons.

Established in 1983 as one of the first dedicated HIV clinics in the United States, Ward 86 has pioneered a comprehensive medical model that integrates HIV primary and specialty care, social services, and case management- where providers treated not only the disease, but the person.

Ward 86's comprehensive HIV care model has been widely adopted around the world as the San Francisco model of HIV/AIDS care.

How We Make a Difference

The Lobby at Ward 86 - A Health Access Point Program

Designed to provide accessible and comprehensive health services to San Francisco communities, offering a welcoming space (on the first floor of Building 80 on the ZSFG Campus) where individuals can drop in and receive a range of health services, including preventive care and screenings, support with substance use disorders, and general health check-ups.

POP-UP Program- For People with HIV Experiencing Homelessness

The program provides medical and psychosocial services for individuals who are living with HIV and who are homeless or unstably housed, and offers financial incentives for linkage and retention in care, enhanced patient outreach, and referral for HIV housing.

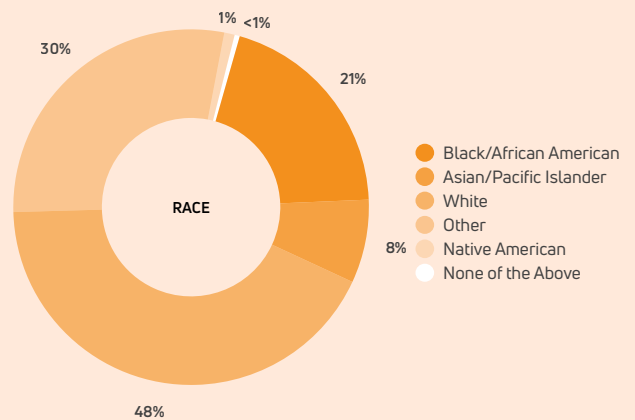

Golden Compass (HIV & Aging)

The program provides multidisciplinary medical care and psychosocial needs of people over 50 living with HIV, who have an increased risk of conditions such as heart disease, osteoporosis (thin bones), memory problems and cancer.

Women's HIV Clinic

Women with HIV have special needs, including designated gynecologic and obstetric services; bone health; support groups; acupuncture; and additional services.

Who We Serve

29% of people are of Hispanic/Latino/a/x origin

SPLASH Program - Long-Acting Injectable HIV Treatment and Prevention

Provides long-acting injectable antiretroviral therapy (ART) for both HIV treatment and HIV prevention (PrEP), this program aims to enhance adherence and improve health outcomes by offering an alternative to daily oral medications.

RAPID start and RAPID Restart

At Ward 86, our goal for every person living with HIV is the achievement and maintenance of virologic suppression which improves individual and public health outcomes. We rapidly start ART with a new diagnosis or in those out of care.

Revival of Care Program

At Ward 86, we aim to provide excellence in mental health care, substance use services and preventative care for all people with HIV.
